

COMPANY PROFILE

2025

Service beyond your expectation

Jaurden Services (Pty)LTD is a dynamic umbrella and multi-services company, established in 2010 in the wake of South Africa's successful hosting of the FIFA World Cup. Officially registered in 2013, the company operates with the vision of providing comprehensive, high-quality solutions across various sectors. Jaurden Services is driven by a commitment to excellence, innovation, and customer satisfaction, catering to diverse needs in both public and private sectors.

Jaurden Services has successfully extended its operations into the Democratic Republic of Congo (DR Congo) under International Engineering Services -IES, cementing its presence across Southern Africa. With a robust foundation built by supporting educational institutions like Stanford Science Academy and Oxford Little Angels, the company continues to expand and fuel its growth by partnering with various stakeholders in different industries.

Stanford Science Academy is one of the flagship divisions of Jaurden Services. It focuses on higher education, research, and project elaboration. Through this academy, Jaurden Services is empowering future leaders by providing academic programs, research opportunities, and consultancy services. Our academy partners with institutions, industries, and governments to solve real-world problems through research-driven innovation.

Key Services: Higher education programs, Mining, research consultancy, project development, academic workshops, training.

Our Vision

To deliver tailored, top-notch services that meet the evolving needs of our clients, while maintaining a steadfast commitment to professionalism, integrity, and innovation in everything we do.

Our Mission

To become a leading multi-services provider in Africa, offering reliable, sustainable, and scalable solutions to enhance the quality of life for communities and drive socio-economic development.

Why Choose Us?

- **Experience and Expertise:** With over a decade of experience, Jaurden Services is backed by a team of seasoned professionals across multiple industries.
- **Customer-Centric Approach:** We prioritize our clients' needs and are committed to delivering high-quality, innovative solutions tailored to their specific requirements.
- **Sustainability:** Our business model incorporates sustainable practices, focusing on environmental impact reduction, social responsibility, and long-term value creation.

Metrology Services

Our Services

VERIFICATION OF MEASURING INSTRUMENTS

- Inspection and verification of measuring devices across various sectors (scales, thermometers, hygrometers, etc.).
- Certification and calibration of equipment to ensure accuracy and compliance with international standards.

LEGAL METROLOGY FOR GAS STATIONS (FUEL STATIONS)

- Periodic verification and calibration of fuel pumps to ensure compliance with regulations.
- Measurement and control of volumes dispensed by pumps to prevent distribution errors.
- Technical assistance and advice for maintaining equipment in fuel stations.

CALIBRATION OF PRESSURE AND TEMPERATURE INSTRUMENTS

- Calibration services for pressure gauges, thermometers, and other instruments used in industrial and commercial environments.
- Calibration of pressure sensors in quality control systems.

WEIGHING SYSTEM CONTROL

- Verification of scales used in industrial, commercial environments, and retail points to ensure weighing accuracy.
- Calibration and adjustment services for weighing systems.

CALIBRATION OF VOLUMETRIC INSTRUMENTS

- Measurement and calibration of containers and devices used to quantify volumes in industrial and commercial sectors, including the petroleum and chemical industries.

METROLOGICAL AUDIT

- Conducting audits to assess the compliance of installations and equipment with metrological requirements.
- Recommendations for improving measurement processes to optimize the quality and reliability of products and services.
- Control of Weighing Systems
- Calibration of Volumetric Instruments
- Metrological Audit

FRESH THINKING

We're focused on process and execution that is mindful and responsible.

We offer a circular design approach that streamlines the process and ensures projects are completed without surprises.

Our projects are icons of creativity that help communities reimagine what spaces for humans are fully capable of.

Our projects are alive and evolve, to be a platform for the users to evolve along with them. They are intuitive and welcoming environments.

By employing emerging technology and ways that extend out of conventional architectural process and thinking.

Product Distribution Services

RETAIL DISTRIBUTION

- Product placement in major supermarkets, pharmacies, and convenience stores.
- Strategic retail partnerships to ensure high visibility and customer access.

E-COMMERCE INTEGRATION

- Seamless integration with online platforms for automated order processing and delivery.
- Setting up and managing online store profiles for clients.

MARKET RESEARCH AND PRODUCT PLACEMENT

- Conducting market research to identify ideal distribution channels.
- Optimized placement of products based on consumer demand and location insights.

VENDOR MANAGEMENT

- Collaboration with suppliers, manufacturers, and logistics partners to ensure smooth product flow.
- End-to-end tracking of the supply chain from the supplier to the final point of sale.

MARKETING AND SALES SUPPORT

- Development of promotional campaigns and product demonstrations.
- Providing marketing materials such as flyers, posters, and social media content.

WAREHOUSING AND INVENTORY MANAGEMENT

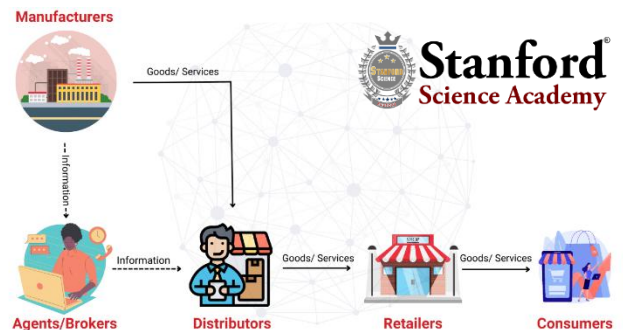

- Secure storage solutions for products with real-time inventory tracking.
- Temperature-controlled and dry storage facilities.
- Stock management and replenishment alerts.

ORDER FULFILLMENT

- Fast and efficient picking, packing, and shipping of orders.
- Custom packaging options based on client preferences.
- Direct-to-customer delivery and corporate bulk shipments.

LAST-MILE DELIVERY

- Reliable, on-time delivery to retail outlets, hotels, restaurants, and other commercial clients.
- Use of multiple logistics channels (vehicles, bicycles, etc.) for flexible delivery solutions.

Our Legal Team:

Our highly qualified legal team brings extensive experience across various legal domains in Africa, with a strong focus on OHADA law, commercial litigation, corporate governance, and contractual matters. Our expertise spans providing legal advisory services to both private and public entities, ensuring compliance with regulatory frameworks and supporting clients in complex cross-border transactions and disputes.

Our Juridical Advisor - OHADA Law Expert:

At the helm of our legal team is our esteemed Conseiller Juridique, a Doctor in OHADA law with a deep understanding of the legal intricacies in Africa's Francophone countries. With years of experience in interpreting and applying the OHADA uniform acts

Commercial Law Services

Continued

CONTRACT DRAFTING AND REVIEW:

Drafting, reviewing, and negotiating contracts, including sales agreements, partnership agreements, service contracts, and lease agreements to protect clients' interests.

BUSINESS FORMATION AND STRUCTURING:

Advising on and facilitating the formation of business entities (e.g., partnerships, corporations, LLCs), ensuring compliance with local regulations, and optimizing legal structures for tax and liability purposes.

MERGERS AND ACQUISITIONS (M&A):

Providing legal guidance on business acquisitions, mergers, joint ventures, and strategic partnerships, including due diligence, negotiation, and contract drafting.

CORPORATE GOVERNANCE:

Advising businesses on corporate governance issues, helping to ensure compliance with regulations, and developing company policies and procedures.

EMPLOYMENT LAW COMPLIANCE:

Assisting businesses in drafting employee contracts, advising on labor laws, and handling disputes related to employment, workplace policies, and wrongful terminations.

INTELLECTUAL PROPERTY PROTECTION:

Assisting businesses in protecting their intellectual property, including trademarks, patents, copyrights, and trade secrets.

COMMERCIAL LITIGATION:

Representing businesses in commercial disputes, including breach of contract claims, shareholder disputes, and conflicts over intellectual property or business competition.

REGULATORY COMPLIANCE:

Advising clients on compliance with industry-specific regulations (e.g., banking, energy, telecommunications) and helping avoid penalties for non-compliance.

FRANCHISE LAW:

Advising businesses on franchising opportunities, drafting franchise agreements, and ensuring compliance with franchising laws.

DEBT RECOVERY AND INSOLVENCY:

Assisting with the collection of outstanding debts and advising on insolvency or bankruptcy proceedings, helping businesses navigate financial restructuring.

REAL ESTATE TRANSACTIONS:

Providing legal support for the purchase, sale, and leasing of commercial real estate, including negotiation of terms and ensuring compliance with zoning laws.

COMPETITION AND ANTITRUST LAW:

Advising businesses on compliance with competition laws and defending against allegations of unfair business practices, monopolies, or price-fixing.

COMMERCIAL ARBITRATION AND MEDIATION:

Offering alternative dispute resolution services, including arbitration and mediation, to settle business disputes without going to court.

TAX LAW ADVISORY:

Providing guidance on tax law issues relevant to commercial transactions, tax planning, and disputes with tax authorities.

Mineral Reserve Evaluation & 3D Modeling (Datamine)	REM01	1 day to 3 months

Admission - Matric Level
Requirements: - N3 level

Short & Long course: **MINE SURVEYING**

Mine surveying is a branch of mining science and technology. It includes all measurements, calculations and mapping which serve the purpose of ascertaining and documenting information at all stages from prospecting to exploitation and utilizing mineral deposits both by surface and underground working. It includes the study of the geology of the deposit, the determination of positions, volumes and quantities that is used in the design, development and excavation of minerals.

Career Options:

Mine Surveyors are employed within the field of mining science and technology, with a key focus on measurements, evaluating, calculations and mapping for all stages of the mining process. It also involves organizing, operating and monitoring mining processes in conjunction with environmental protection and health and safety requirements for underground working conditions. Through technological advancements, the industry has improved production levels and safety whilst simultaneously managing environmental impact,

Career Opportunities:

- General Manager
- Mineral Resource Manager
- Surface Mining Surveyor
- Underground Mining Surveyor
- Survey Analyst
- Mine Planner
- Geospatial Engineering Consultant
- Geospatial Systems Manager
- Mine Manager

Short & Long course: **MINING ENGINEERING**

Mining Engineering technologists are involved in the daily production activities that includes the design of excavations, developing drilling patterns for the explosives, the cleaning of the broken rock and the support of excavations.

A Mining Engineer may manage any phase of the mining value chain including exploration, feasibility studies, mine design, resource reporting and rehabilitation of mining land.

Career Options:

Mining Engineering is a combination of several areas of expertise. It involves organizing, operating and monitoring mining processes in conjunction with environmental protection and health and safety requirements for underground working conditions. Through technological advancements, the industry has improved production levels and safety whilst simultaneously managing environmental impact. Strategic industry relations provide a platform for graduate. Mining Companies, software companies for planners, investment companies and more and more opportunities in consulting practices are becoming available.

Career Opportunities:

- General Manager
- Health and Safety Manager
- Mine Manager
- Miner
- Mineral Resources Manager
- Mining Engineer – Academic/Research
- Project Manager
- Rock Engineering Manager
- Sales Representative (Industrial Products)
- Superintendent
- Technical Services Manager

Stanford[®] Science Academy

Stanford[®]
Science Academy

Short & Long Course **CHEMICAL ENGINEERING**

Chemical engineering is the study and practice of transforming substances at large scales for the tangible improvement of the human condition. Such transformations are executed to produce other useful substances or energy, and lie at the heart of vast segments of the chemical, petroleum, pharmaceutical and electronic industries.

Career opportunities:

Chemical engineers work in manufacturing, pharmaceuticals, healthcare, design and construction, pulp and paper, petrochemicals, food processing, specialty chemicals, polymers, biotechnology, and environmental health and safety industries, among others.

Specialization

- Process operator
- Technician
- Laboratory (Demonstrator, technician, manager)
- Chemical engineer
- Environmental protection
- Research and development chemistry
- Quality control

Certificate: **EDUCARE**

Educare looks at the programming and instructional support that develop early skills and nurture the strong parent-child relationships that create the foundation for successful learning.

Career opportunities:

- Social worker
- Day Care Teacher
- Early childhood development Educator
- Special Education Coordinator
- Preschool Teacher Aide
- Preschool Lead Teacher

Short & Long Course: **BUSINESS MANAGEMENT**

BUSINESS MANAGEMENT is the function that coordinates the efforts of people to accomplish goals and objectives by using available resources efficiently and effectively. Business management includes planning, organizing, staffing, leading or directing, and controlling a business to accomplish the goal.

Career Opportunities:

One of the best advantages professionals gain from a career in business management is a sense of job security, because no matter where cutbacks are made, companies still need someone to stick around and run the business. While the economy recovers, and businesses start to see an increase in profits as customers return to healthier spending, general managers will also enjoy the pride that comes with being the cog in the machine that allowed for upsurges in business.

Specialization:

Some typical titles that are applied to general business managers are President, Vice President, Branch Manager, Chief Marketing Officer, Chief Financial Officer, Director and Chief Operating Officer. Specific duties of each position changes depending on the needs of the company and how it formulates its chain of command, but for the most part, a career in general management places professionals in top positions in business. They always have at least some authority over lower level managers who directly report to them.

Short & Long Course: **FINANCIAL MANAGEMENT**

Financial management refers to the efficient and effective management of money (funds) in such a manner as to accomplish the objectives of the organization. It is the specialized function directly associated with the top management. The significance of this function is not only seen in the 'Line' but also in the capacity of 'Staff' in overall administration of a company.

Career opportunities:

Financial managers' responsibilities vary according to position. Specific titles include controller, treasurer or finance officer, credit manager, cash manager, and risk and insurance manager. Controllers prepare special reports as required by regulatory authorities and oversee the preparation of financial reports, such as income statements, balance sheets, and analyses of future earnings or expenses, which describe and predict the organization's financial position. In many firms, controllers supervise the accounting, audit, and budget departments.

Short & Long Course: **END USER COMPUTING**

The qualification provides a framework for learners to develop skills that will enable them to become competent in End User Computing. It introduces theoretical and Application of End User Computing to develop a range of skills that will enable learners to be better-informed workers in their chosen industry. It provides a balanced learning experience to enable life long learning and to productive employment.

Career opportunities:

- Secretary
- Project Administrator
- Data Capturer
- Office Administrator
- Job in IT or Business environment

Certificate: **Artificial Intelligent**

The field of artificial intelligence encompasses computer science, natural language processing, coding, mathematics, data science, and many other disciplines.

Artificial Intelligence is a method of making a computer, a computer-controlled robot, or a software think intelligently like the human mind. AI is accomplished by studying the patterns of the human brain and by analyzing the cognitive process. The outcome of these studies develops intelligent software and systems.

Career opportunities:

- Data Scientist
- Machine Learning Engineer
- Research Scientists
- Big Data Architect
- Video Game and Software Programmer.

Executive Staff

At Jaurden Services, we pride ourselves on an experienced and diverse team of professionals with expertise across various industries.

Rev. Heaven E. Ndonga

Business development and Accounting, Mining Surveyor, Mineral Reserves and Resources Evaluator, Mine Planner, Researcher.

Mr. Heaven brings a wealth of knowledge in mining and resource evaluation. He is proficient in mine planning and has a strong background in research and business accounting, giving him a holistic approach to resource management and a Datamine lectures at the University of Johannesburg.

Mr Bizau Mondo

Judiciary Advisor, President of Commercial Tribunal of Haut Katanga, Doctor in OHADA's Law.

As a legal expert and a key figure in the commercial legal landscape of DRC, Dr. Mondo provides deep insights into OHADA Law, making him an indispensable asset for businesses navigating commercial law.

Mr. Christophe Nzau H Ndonga

Metrologist Engineer and Specialist.

Mr. Ndonga is an expert in engineering and metrology, ensuring precision in measurement and technical specifications in various engineering projects. Expert in petroleum and regulation industry.

Mrs. Noella Namasi Cisangani

Education Manager, Criminologist, Expert in Child and Youth Development, Business Developer.

Mrs. Cisangani is a specialist in education management, criminology, business development, child and youth development, with a strong focus on creating impactful educational programs and social initiatives.

Dr. Mpanza Mbalenhle

Geologist, Researcher, Coordinator, Lecturer.

Dr. Mpanza is a renowned geologist, expert in geostatistics with extensive research and academic experience. she has coordinated various geological projects and lectures at the University of Johannesburg.

Mr. Victor Seonja

Computer Scientist

Mr Victor is a renowned computer engineer, expert in software development, website, mobile application and AI. He coordinate the IT Department

Executive Staff

Continued

Mr. Pax Kitenge Tshomba

Business Developer, Coach, Psychologist, and Personal Development Specialist.

Mr. Tshomba specializes in guiding individuals and businesses towards success by leveraging his expertise in business development, motivational coaching, and strategic growth plans. Focus on human capital development and organizational improvement.

Mr. Jonathan Losonene Kayumba

Economist, Administrator, Accountant, and Financial Auditor

Mr. Jonathan Kayumba brings his experience in financial administration, accounting, taxation, and human resource management. His specialties include streamlining financial operations, conducting audits, and enhancing organizational efficiency through robust administrative strategies.

Dr. Efadzwa Tipoy

Medical Doctor & Hospital Manager

Dr. Efadzwa Tipoy is a skilled medical doctor and hospital manager, currently leading as government healthcare management in Johannesburg. His expertise spans clinical services, hospital administration, and healthcare strategies, ensuring efficient patient care and the management of health facilities.

Mr. Christian Caleb

Architect, Civil Engineer.

Mr. Caleb is both an architect and civil engineer, designing and overseeing the construction of commercial, industrial, and residential projects with a focus on functionality and sustainability.

Ms. Lerato Rapoo

Diamond and petrol expert.

Ms. Rapoo is highly skilled in the diamond and petroleum industry, providing expert consultation on diamond valuation, grading, and market trends.

Ms Yochin Ndonga

Interior Designer.

Ms Yochin Ndonga brings a creative edge to interior design, offering customized solutions for commercial and private spaces.

Ms. Carmel Mould

Bsc. Philosophy and Programme Management

Ms. Carmel Mould is a highly skilled professional with expertise in Programme Management. With a strong background in strategic planning, project execution, and stakeholder engagement.

Holding Structures

At Jaurden Services Holding, our strength lies in the diversity and autonomy of our subsidiaries, each specialized and highly skilled in its respective field. This structure allows us to operate across a wide range of industries, ensuring flexibility and resilience in a dynamic business environment. The independence of each company fosters innovation, agility, and a strong focus on their specific markets, while the group's support and resources enable strategic growth and operational excellence. Together, we leverage this combination of independence and collaboration to deliver exceptional value to our clients and stakeholders.

We take great pride in the remarkable journey we have built over the decades. Our diverse range of services, combined with unparalleled expertise, has not only allowed us to meet the evolving needs of our clients but also to exceed expectations across all sectors.
